OUR CERTIFICATIONS

Microseptic is an antimicrobial technology used on the surface and backing of our products. The antimicrobial agent present in our mats neutralizes 99.9% of bacterial proliferation.

NFSI certifies the resistance to slips on wet surfaces.

CRI Green Label Plus certifies products with a low-rate emission of volatile organic components. (VOC)

thanks to its high positive static charge.

I OUR TECHNOLOGIES

HOW TO CHOOSE THE RIGHT ENTRANCE MAT

Identify the following symbols while browsing the catalog to find the right mat for you.

- For outdoor/indoor entrance and vestibule
- Scrapes and traps dirt/salt which prevents it from entering the building

- For indoor entrance
- Removes debris from shoes and retains water to keep entrances clean

- For indoor areas
- Absorbs water to keep hallways dry and safe

ERGONOMIC MATTING MATTING **SPECIALIST**

PREVENTS MUSCLE FATIGUE

Flexibility

Allows proper weight distribution while reducing the impact on joints and permitting a more natural position while diminishing stress on pressure points.

Support

Provides resilience and bounce.
As the worker's foot presses into the mat, the mat's foam
pushes back against the foot preventing blood from
stagnating and enabling the return of energy.

OUR ZEDLAN PRODUCTS OFFER INCOMPARABLE ADVANTAGES:

More energy!

Our Zedlan Foam offers three times the bounce of traditional anti-fatigue products

Increased durability!

Our Zedlan Foam outwears similar products by nearly three to one

Less slips and falls!

Our Zedlan Foam offers superior traction compared to standard foam products

Extreme flexibility!

Our Zedlan Foam conserves its anti-fatigue properties, even under freezing temperatures

Zedlan Plus

In addition to offering a patented superior quality anti-fatigue foam, our Zedlan Plus neutralizes up to 99.9% of bacteria proliferation. Its exclusive composition also provides an antistatic protection of 10^9 ohms.

YOUR SATISFACTION IS OUR PRIORITY

NO OTHER MAT WILL DO A BETTER JOB!

Our Performance, Prestige, Comfort+ and Pure Soft collections were developed to provide you with the best matting solutions within the marketplace, to reduce your maintenance costs and to ensure the health and safety of your employees and customers. We commit ourselves to replace your mats if they do not live up to our promises.

MANUFACTURER'S WARRANTY

Mat Tech garantees its products against manufacturing defects for a period of 1 year if properly used and maintained per manufacturer's recommendations.

INSTRUCTIONS MAINTENANCE AND CLEANING

ENTRANCE MATTING

Regular maintenance is essential to prolong the appearance and efficiency of your mats. It is recommended to develop a maintenance schedule. The frequency will depend on the traffic and soil conditions.

INITIAL MAT USE

- 1 Mats should be unrolled and laid flat a few hours prior to use.
- 2 Normal shedding or "fuzzing" may appear on the surface of your new mat. This will disappear after a few vacuumings.
- 3 To store mats once fully cleaned, roll them into their original boxes. Store flat in heated area.

PERIODIC MAINTENANCE

Entrance mats are used to capture dirt and debris before it is tracked into your building. However, mats must be cleaned regularly to extend their usefulness and appearance.

- 1 Vacuum dailu
- 2 On a monthly basis summer use, apply a water-based carpet cleaner with sprayer and leave on for ten minutes.

 Extract surplus using a wet/dry vacuum.
- 3 On a weekly basis during peak winter use, apply a water-based carpet cleaner with sprayer and leave on for twenty minutes. Extract surplus using a carpet extractor or a wet/dry vacuum.
- 4 During peak winter use, if necessary, remove salt or ice melter stains using a salt neutralizer following the manufacturer's instructions. Repeat if needed.

Important

Never use rotary scrubbers or other mechanical cleaners or scrubbers. Do not use solvents, pH detergents, or alkalis directly on the mat.

ERGONOMIC MATS

Regular maintenance is essential to prolong the appearance and efficiency of your mats. It is recommended to develop a maintenance schedule. The frequency will depend on the traffic and soil conditions.

INITIAL MAT USE

- 1 Mats should be unrolled and laid flat a few hours prior to use.
- $2\,{\mid}\,$ Always make sure the floor is clean and non-greasy before laying mats.

PERIODIC MAINTENANCE

Anti-fatigue mats for dry environments

While properly maintained, anti-fatigue mats offer optimal performance.

- 1 | Shake or sweep daily to remove surface dirt.
- 2 | Sweep the area underneath the mat of dirt and debris that could cause premature wear or loss of traction.
- 3 | Mats should be cleaned with a damp mop using a pH neutral, non-abrasive detergent.
- 4 Allow the mat to completely dry before using.

Anti-fatigue mats for wet and oily environments

- 1 | Shake or sweep daily to remove surface dirt.
- 2 | Sweep and clean the area underneath the mat that could cause premature wear or loss of traction.
- $3\,|$ Mats can be cleaned with a pressure washer or gently scrubbed with a non-abrasive, water-based detergent.
- 4 | Mats resistant to oils and greases must be occasionally cleaned with a water-based degreaser to eliminate excess oils. Never place in a commercial dishwasher.
